About Us

Cheminée Designs creates custom and reproduction fireplace surrounds, moldings, fireboxes, and boiserie (fine woodwork). Our fireplaces and kitchen vent overhoods are fabricated using a noncombustible, zero-clearance, fiber-reinforced cast stone. Our moldings are fabricated using fireproof, architectural-grade, reinforced plaster. All of our products can be created in about 25 colors, and polished, marble, and weathered stone finishes are available. We have developed a process for matching the stain of your existing woodwork, and all of Cheminée Designs' products can be fabricated for exterior applications.
